

Dosis and Application stages

Fertirrigation

Doses: 3 to 5 liters/hectarea and by application
Application stages: from 2 to 4 all along the vegetative cycle

Foliar Applications

Doses: from 250 to 350 cc/100 liters of water
Application stages: from 2 to 4 all along the vegetative cycle

CYTRAL[®] Zn

Liquid complex of Zinc highly concentrated with high power of penetration and translocation.

Corrects Zinc deficiency in all crops.

Activator of plant metabolism.

PROPERTIES

CYTRAL Zn is a liquid complex concentrated in Zinc and complexed by gluconic acid. It can be used on foliar application and/or on roots to struggle against Zinc deficiencies that affect efficiency, quality and size of the fruit by a bad fruit set.

CYTRAL Zn acts as an activator of plant metabolism which favour roots development, photosynthesis and natural hormone synthesis by plant such as Gibberellic acid.

INCOMPATIBILITIES

CYTRAL Zn is compatible with the most of products of the market. In case of doubt, please make a test before general treatment.

CAUTIONS

When using product, do not eat, drink, neither smoke. Avoid any contacts with eyes and skin. In case of contact with skin, rinse immediately with plenty of water.

Storage

Keep the product in its original packing tightly closed, protected from light and humidity and in a well-ventilated place.

Guarantee and user's risk

The producer guarantees product's composition and content in its original packing. Users and handlers of this product should assume the risks derived from factors not depending on the manufacturer. The manufacturer doesn't assume consequences resulting from storage or handling not in conformity with our recommendations.

COMPOSITION (w/w):

Zinc (Zn): 7,00% (9,00% w/v)
Complexed by gluconic acid

pH = 4,0 - 4,5 Density = 1290 g/L
