

Dosis and application stages

Fertirrigation

CROPS	Dosis and application stages
Vegetable (tomatoes, peppers, green beans, ...) Fruit (Rosaceae), cut flower and Subtropical Crops	Throughout the growth cycle in an amount of 3 to 4 liters per hectare per week
Hydroponics	70 to 75 ml per m3 of water

liquid fertilizer concentrate with micronutrients for soil application and fertigation

COMPOSITION (w/w):
 Iron (Fe) EDTA: 1,00% (1,20% w/v)
 Manganese (Mn) EDTA: 0,94% (1,12% w/v)
 Copper (Cu) EDTA: 1,15% (1,36% w/v)
 Zinc (Zn) EDTA: 0,42% (0,49% w/v)
 Molybdenum (Mo): 0,054% (0,06% w/v)
 Boron (B): 0,50% (0,59% w/v)
 pH : 1,5-2,0 / Density : 1190 g/l (20°C)

MIX DRIP®

12Fe

Fe

PROPERTIES

MIX DRIP 12 Fe is a liquid fertilizer for soil and fertigation applications to satisfy all the needs of your crops in nitrogen and trace elements. Its rich formulation chelated iron is specially designed for use in fertigation throughout the growing season, especially on crops sensitive to chlorosis ferric and when physico-chemical conditions of the unfavorable soil. He is from the RLPF manufacturing process (Reacted Liquid Plant Food Nutrition) ensuring perfect assimilation and translocation of nutritional elements.

INCOMPATIBILITIES

MIX DRIP 12 Fe is compatible with the most of products of the market. In case of doubt, please make a test before general treatment.

CAUTIONS

When using product, do not eat, drink, neither smoke. Avoid any contacts with eyes and skin. In case of contact with skin, rinse immediately with plenty of water.

Storage

Keep the product in its original packing tightly closed, protected from light and humidity and in a well-ventilated place.

Guarantee and user's risk

The producer guarantees product's composition and content in its original packing. Users and handlers of this product should assume the risks derived from factors not depending on the manufacturer. The manufacturer doesn't assume consequences resulting from storage or handling not in conformity with our recommendations.
