

CORRECTOR OF SALTY WATER

COMPOSITION:

Calcium oxide (CaO) 7 % p/p
water soluble
Calcium oxide (CaO) 3.5 % p/p
complexed

NET WEIGHT: 1,24 KG.

QUANTITIES:

The product is added to the irrigation water in the following orientative proportions

Gr/l of salts	Electrical conductivity(microsmoh/cm)	c.c.SODIAL/ m ³ of water
From 0.8 to 1.30 gr/l	From 308 to 2031	From 10 to 20 cc
From 1.30 to 2.50 gr/l	From 2031 to 3696	From 20 to 35 cc
From 2.50 to 4.00 gr/l	From 3696 to 4250	From 35 to 55 cc
4 gr/l and up	From 4250 and up	Add proportionately

If a water analysis is not available then an average application would be between 50 and 200 litres of SODIAL distributed per hectare/year depending on the irrigation system available.
These quantities are orientative and it will be up to increase or decrease them depending on the quality of the irrigation water.

BASICAL DESCRIPTION OF THE PRODUCT:

SODIAL has been developed in order to combat the problem of the excess of sodium in the irrigation water, correcting the harmful effects such as salination and progressive alkalination of cultivated soils, due to the use of irrigation water with a high content of sodium and bicarbonates, which bring about the precipitation in the soil of residual sodium carbonate. The excess of sodium produces a dispersing action, causing the disintegration of the soil's structure. SODIAL nullifies this effect, combating the excess of sodium when it is substituted by calcium, provoking a flocculating effect. SODIAL is a mixture of several organic and inorganic acids that act by interchanging sodium with calcium provoking the washing away of the sodium salts by means of leaching.

CORRECTOR OF SALTY WATER

HOW TO APPLY:

It should always be used diluted in water.
We recommend that the amount to be used be spread over various periods as detailed below.

Flooding or spraying irrigation:

Distribute in 2 or 3 lots.

Drip or sprinkling irrigation:

The amount to be used be spread over weekly or fortnightly periods.
SODIAL can be mixed with mineral fertilizers.

NOTES: Warning to the user:

The company guarantees the composition and the content of the product. However, in the utilization and mixtures can intervene factors that escape from our control. In consequence, the user will be the responsible of the caused hurts (toxicity, residues, lack of efficacy, etc...).

EXPIRY DATE: 3 years from manufacturing date.

Warning

H302 Harmful if swallowed
H319 Causes serious eye irritation.
P102 Keep out of reach of childre
P270 Do not eat, drink or smoke when using this product
P264 Wash thoroughly after handling
P280 Wear protective gloves/protective clothing/eye protection/face protection
P301+P312 IF SWALLOWED Call a POISON CENTER/doctor...if you feel unwell
P305+P351+P338+P310 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician.
Contains Calcium nitrate.

shake before use
