SYNERGIAC[®]

AA

Liquid fertilizer EC NPK, rich in amino acids and seaweed extracts, with high powers of penetration and translocation

AA

COMPOSITION :

Nitrogen (N) : 20 g/L under organic form

Phosphoric Acid (P₂O₅) : 110 g/L water soluble

Potassium Oxide (K₂O) : 120 g/L water soluble

Amino Acids from plant origin : 210 g/L water soluble

Seaweeds extracts solubilized : 20 g/L water soluble

Trace Elements water soluble:

Iron (Fe) EDTA : 1 g/L EDTA

Copper (Cu) EDTA : 0,13 g/L EDTA

Manganese (Mn) EDTA : 0,50 g/L EDTA

Zinc (Zn) EDTA : 0,50 g/L EDTA

Boron (B) : 9 g/L

pH = 6,5 Density : 1300 g/L

PROPERTIES

SYNERGIAC is a new generation of liquid fertilizer integrating all the major elements (NPK), but also concentrated seaweed extracts, amino acids of plant origin and polysaccharides.

Specially formulated for use in foliar applications, **SYNERGIAC** has a very high power of penetration and translocation allowing all the elements to spread rapidly through the plant tissues.

Its use is intended to stimulate and promote better flowering / fruit set and better resistance to stress by the presence of crucial elements which act directly on all the enzymatic metabolisms of the plant.

CAUTIONS

When using product, do not eat, drink, neither smoke. Avoid any contacts with eyes and skin. In case of contact with skin, rinse immediately with plenty of water.

Storage

Keep the product in its original packing tightly closed, protected from light and humidity and in a well-ventilated place.

Guarantee and user's risk

The producer guarantees product's composition and content in its original packing. Users and handlers of this product should assume the risks derived from factors not depending on the manufacturer. The manufacturer doesn't assume consequences resulting from storage or handling not in conformity with our recommendations.
